

**Position:** Software Engineer

**Position Summary:**

We're looking for a Software Engineer to join our team and help us grow our business and improve our product line. We need a top-notch programmer who loves to build products, thrives in an agile environment, and is passionate about renewable energy.

In the near term you'll be working on new features for PowerClerk®, a web-based application that administrates economic incentives for the renewable energy industry. In the longer term you'll work across all of our products, including Clean Power Estimator®, an application that estimates cost and benefits of clean energy systems; QuickQuotes, which enables dealers and resellers to quickly generate sales quotes for clean energy systems; SolarAnywhere, which provides insolation data for purposes such as solar prospecting; PVCheck, which evaluates photovoltaic system performance; and other existing and future products.

This position uses C#/ASP.NET/SQL Server. Prior experience with these technologies is helpful but not required. We do require professional level proficiency in at least one of the following programming languages: C#, Java and/or C++.

This position is located in Kirkland, WA. Local candidates only, please.

**About the Company:**

Clean Power Research® provides services for making informed clean energy decisions. These services include online software systems, consulting and research. The company has been in business for over 10 years and has offices in Kirkland, WA and Napa, CA. We offer a startup-like environment coupled with the stability and customer base of an established company.

**Duties and Responsibilities:**

- Design, build and deliver new features and products
- Be a high-horsepower contributor delivering production quality code
- Engage with customers to understand and address their needs

**Requirements:**

- Passion for solar energy or renewables essential
- BA/BS or MS degree in Computer Science or related technical discipline
- Expertise in at least one of C#, Java or C++
- C#/ASP.NET/SQL Server experience a plus
- Excellent core computer science skills including algorithms, data structures, analysis and problem solving
- Excellent written and verbal English communication skills

Clean Power Research provides competitive compensation and benefits packages.

Send cover letter detailing your interest in the renewable energy space and resume to: [jobs@cleanpower.com](mailto:jobs@cleanpower.com)

Due to the high number of applicants for our positions, we regret that we can only respond to candidates who we would like to interview.
